

## MARINA STREKOZOVA | Senior Product Designer

Belgrade, Serbia | phone: [+381629644571](tel:+381629644571) | email: [strekozova.ma@gmail.com](mailto:strekozova.ma@gmail.com)  
[linkedin.com/in/marinastrekozova](https://www.linkedin.com/in/marinastrekozova) | [portfolio](#)

Senior Product Designer with **6+** years of experience delivering user-centered solutions in complex domains like **FinTech** and **HealthTech**. Spearheaded the redesign of a core banking feature that cut support inquiries by **50%**, saving over **€20** million annually. Specializing in simplifying complex data flows, improving user self-service. Designed **AI-powered** tools for medical providers, simplifying clinical documentation workflows.

### Senior Product Designer – [MEDvidi HealthTech](#) | March 2025 - Present (1 year 1 month)

U.S.-based (30+ states) Tele-Mental Health Platform: Providers Portal, Patient portal, CRM

- Owned the end-to-end experience design for the Provider Portal and CRM, streamlining clinical workflows and delivering production-ready solutions to cut operational overhead.
- Designed provider-facing experiences, including AI-powered chart review and generation, as well as follow-up treatment tracking, reducing administrative workload.
- Designed provider financial transparency flows that made compensation status explicit, reducing ambiguity and frustration while strengthening trust in the platform.
- Redesigned a complex legacy CRM information architecture, reducing flow complexity and improving navigation for operations teams.

### Product Designer – [Tbank Fintech](#) | November 2022 - November 2024 (2 years)

T-Bank (ex-Tinkoff Bank) — leading digital bank in Russia transforming retail and SME banking; serving 40M+ customers with strong YoY growth in transaction volumes

- Led the Arrestments experience design, which reduced support inquiries by over **50%**, resulting in annual savings over **€20 mln**
- Redesigned the phone number change process, introducing a streamlined verification flow that cut down on user errors and support escalations for a critical security journey.
- Designed a procedure player flow where next-best actions adapt to user responses, **increasing** successful self-resolution and reducing escalations to live agents.

### Product Designer – [Evrone](#) | December 2021 - August 2022 (9 months)

Software development and engineering (US and Europe), (client projects in MedTech and Automotive HMI)

#### [Amma Pregnancy Tracker](#) 1.5M MAU (MedTech)

- Drove UX improvements for the app's relaunch as a parenthood platform, contributing to its **Top-3** category ranking in the LATAM market.
- Redesigned subscription around stage-based value, delivering **+13%** new paying users
- Implemented onboarding-driven personalization on the home screen, increasing relevance and **engagement**.
- Led iterative redesign improvements for key home-screen experiences, preserving trusted behavior patterns while increasing usability.
- Introduced and **scaled** a design system to improve delivery speed, **UI consistency**, and maintainability, aligned with the brand's visual language and tone of voice.

#### [ATOM](#) (Automotive HMI)

- Designed core interaction experience of an in-car HMI system from concept to launch in **3.5 months**, contributing to a show car that generated over **36,000** pre-orders.

**Junior UX/UI Designer – Finstack FinTech** | March 2020 - October 2021 (1 year 8 months)

Mobile and Web Trading platform

- Designed a mobile trading application from scratch, conducting initial user and market research to define the product's core user experience.
- Created the end-to-end UX for onboarding and KYC, balancing strict compliance requirements with a smooth user flow.

**Digital → Junior UX/UI Designer – Brief SaaS** | August 2019 - February 2020 (6 months)

Messaging cloud SaaS for small businesses startup, mobile-first Slack alternative

- Created landing pages and marketing visuals that defined the product's initial visual identity and supported early user acquisition.
- Transitioned from a digital design role to contribute to the core product's UI/UX.
